### Product Parameters

How to open the door : APP, Fingerprint, Password, IC Card , Key

Number of fingerprints : 100pcs

Number of passwords : APP sends password (Unlimited) / Custom password(150 Groups)

IC card capacity:100

Product material: Zinc alloy

Power Supply : Four alkaline batteries

Applicable lock body : Single tongue lock body / Double tongue lock body (standard)

Passage Mode : Door lock status, easy to switch

Low battery reminder : Low battery indicator, red light flashing reminder

Patented design : Independent design, industrial products made into handicrafts.

Product color: black, red, support color customization

### 2. Installation Notes

### Install the lock body

Left and right reversal of lock body

When installing the lock body, the oblique tongue should face upward, and the oblique surface of the oblique tongue should face the direction of the front panel. If it does not match, the direction of the oblique tongue should be adjusted. Methods as below:

1. Turn the lock body upside down, with the oblique tongue facing down, and let the oblique tongue stop block lean down. As shown in (2)

2. Press the oblique tongue by hand into the lock body to the end and rotate it 180°.

3. Release the oblique tongue, let the oblique tongue pop out along the oblique tongue hole, and reverse the lock body. Figure (3)

Door buckle plate, door buckle box installation

Slot the door frame at the position corresponding to the lock tongue. Put it into the card slot according to the order as shown in the picture. Fix with two lock body screws

### Install the front panel

1. First tighten the two studs on the front panel.

2. Insert the hole end of the square steel into the square steel hole of the front handle and align it with the two small round holes.

3. Pass the pin through the square steel hole, and bend the pin to fix the square steel on the hole.

4. Turn the square steel so that the clutch triangle symbol rotates upwards.

5. Pass the power cord from the front panel through the hole on the door.

6. Pass the upper and lower studs of the front panel through the corresponding holes on the door.

7. Pass the square steel through the square steel hole of the lock body.

8. Fasten the front panel to the door.

Install the rear panel

1. Remove the battery cover from the rear panel.

2. Connect the rear panel power cord to the front panel power cord.

3. Insert the square steel into the hole of the rear handle.

4. Align the upper and lower holes on the rear panel with the positions of the upper and lower studs on the front panel.

5. Put two flat head screws into the upper and lower holes of the rear panel, and align them with the front panel studs to tighten.

6. Install four AAA batteries and close the battery compartment cover.

7. Test the power supply of the door lock, and the installation is complete.

### Door handle reversing left and right

Open the right door and change the direction:

Note: When changing the left and right door handles on the front and rear panels, use a Phillips screwdriver to remove the Phillips adjusting screw handle in the panel and rotate it upwards 180°, and install it into another hole with a Phillips screw.

### APP Application Download

The software (iOS version) can be downloaded from the APP store, and the Android version can be downloaded from the application store of Google play.

APP Store

Google Play

### User Registration And Login

### User registration:

is as follows

On the login page, click "Register" in the upper right corner, enter your mobile phone number or email address, set a password and click Register.

1. User can use phone number or email for registration which supported 159 countries. 2.Verification code will send to phone or email.

3.When the registration is successful, it will jump to home page.

### User login:

On the login page, enter the account and password, and click "Login"

### Add Door Lock Device

### Set Up Fingerprint Unlock

According to the customer's door opening needs Select fingerprint type

Bring your phone close to the door lock device click Start

**Fingerprints** 

Follow the prompts to collect fingerprints

### Set Password To Unlock

Select on the main page Passcodes

Select Generate Passcode

Select the password type according to the use requirements of the door lock
